Proudly Sponsored by

A  Sempra Energy™ company

This workshop will focus on the advantages to incorporating environmental business practices. Our panel presentation will guide you through the steps to create a simple plan your business can use to reduce your costs in energy, water and waste disposal. You can leave the event ready to take quick action to improve your environmental performance and your bottom line.

Confirmed panelists include representatives from California Water Service, The Gas Company, Green Enterprise Movement, Southern California Edison, Sutherland, Unified Grocers, and the US Environmental Protection Agency (EPA).

Event Partner

The Green Enterprise Movement was established to help small and medium enterprises achieve environmental sustainability in their operational activities using the Lean and Green process. GEM's philosophy for doing this is achieving results through people, making them more of a "Green Coach" than an environmental consultant.
